WORKSHOP EQUIPMENT

The order of the days to come originates in the present.

WHAT IS THE ADVANTAGE OF AN ORGANISED ENVIRONMENT?

It makes working in it easier--and more productive!

With its clear tool storage and easy accessibility, Unior workshop equipment helps you keep your workshop in order and thereby increases your productivity.

Tool carriages, chests, cabinets and various boxes for tool storage, as well as work benches, stands, hooks and other accessories are all made of quality sheet steel. Lacquer coated to resist corrosion and scratches, the equipment is practically indestructible.

In addition to the quality and durability, a third quality placing Unior equipment at the top amongst products of this kind is their innovative design. A comprehensive knowledge of all the work requirements of local professionals has resulted in editions of workshop equipment able to offer great accessibility, clear tool storage and improved visibility at any moment.

The new **EuroPLUS** carriages can be recognized immediately by the new design. The carriages are designed and produced according to the 21st century design guidelines, which demand clear lines and soft edges.

The main advantages are the dimensions and construction of carriage. The new design keeps all the parts of the carriage within its outside edges. This means that there are no parts that step out, and can not be damaged or cause injury. In the line with this concept the central locking mechanism is positioned so that the key cannot be broken accidentally.

The next important improved feature is the drawers. The edges are protected with special protective rubber for higher safety and longer life. The drawer runners are new, which enabled us to increase load capacity of drawers. The load capacity is higher by ten percent, compared to standard models.

The EuroPlus has four special antishock rubber protections on the carriage corners. These will enable you to move the carriage around the workshop without the worry of damaging either the carriage or any other object. The antishock rubber will protect your EuroPlus carriage and any other fragile article in the workshop.

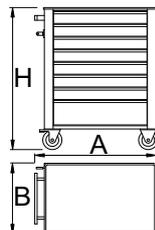

In this professional line of carriages we have also developed a special retractable multipurpose shelf. Now you can simply pull out the shelf, and use it to support any kind of things like documents, manuals, and even your laptop computer. When you do not need it anymore, just push it back to the body of the carriage and again you have a compact carriage

This line has a lot of detailed and useful features, which might be small but are also important. For instance, the work surface is now bigger by twenty percent. The work surface is also recessed by 10 mm so that small parts do not accidentally roll off the carriage. There are also various recesses for holding bottles, oil cans. The perforated sheet metal with ten hooks for hanging different type of hand tools is also new.

920PLUS1 TOOL CARRIAGE EUROPLUS

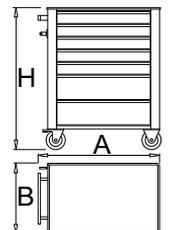

- locking system
- new protective closing mechanism of drawers
- multi - purpose shelf
- new wheels dia. 125mm, for improved agility and stability
- anti - shock rubbers
- perforated sheet metal
- drawers with ball-bearing slides
- the syntetic covering protect drawers and tools from damage
- 8 drawers (seven dimensions 585x405x75mm, one dimensions 585x405x155mm)
- static load capacity of carriages without wheels: 2000 kg
- capacity of small drawers: 28 kg
- capacity of large drawers: 43 kg
- ecological lacquered with cadmium and lead free colour
